COVID CRISIS – THE TIME TO ACT IS NOW **You cannot be socially distant if you need care**

During this time when social distancing and staying home is essential, Elder Life Management and Home Care can provide a Live-In caregiver to avoid the hospital, nursing home, or other alternative care setting.

Our focus remains as it has always been, on providing care and supportive services to older adults in the comfort and safety of home, where they are best protected while receiving care and maintaining one-on-one relationships.

Our licensed caregivers are trained in infectious disease control, and CDC guidelines. Our caregivers are continually updated on protocols and best practices. This ensures safe senior care and eliminates the risk of community-wide exposure.

Caregivers can provide light housekeeping and food preparation ensuring all surfaces are disinfected to maintain continued health. Our trained caregivers also help keep seniors physically and mentally engaged while staying safe at home.

As a full-service agency, we offer additional concierge services including necessities such as coordinating prescription medication and refills, grocery shopping or transportation to medical appointments. We can also help coordinate ordering and obtaining supplies, meals and other necessities. Our professional services include Skilled Nursing, Psychotherapy and Care Management to assure all services can be provided at home, avoiding the Emergency Room, and hospitalization.

WE CAN SAVE LIVES!
